- **Registration –**

- Please visit on URL - <https://openworx.ai/>
- And select a role as a Employer.
- Employer to fill in the details on the registration form. Once the email and phone number are verified, the Employer can log in to the application

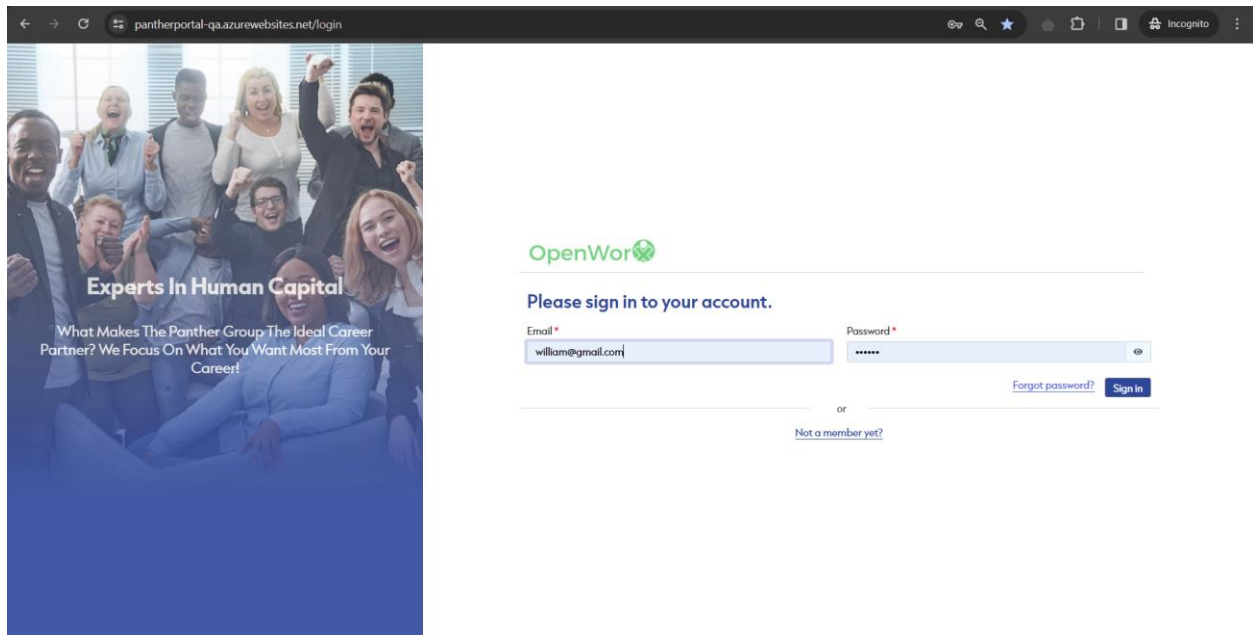

The image shows the OpenWorx registration form. At the top is the OpenWorx logo. Below it, a welcome message says 'Welcome, It only takes a few seconds to create your account'. The user is prompted to 'Please select your role' with two radio buttons: 'Candidate' and 'Customer'. The 'Customer' role is selected. The form contains several input fields: 'Company' (a dropdown menu), 'Prefix' (text input), 'First name' (text input), 'Last name' (text input), 'Email' (text input with a 'Verify' button), 'Phone' (text input with a 'Verify' button), 'Password' (text input with a visibility toggle), 'Confirm password' (text input with a visibility toggle), 'City, State' (dropdown menu), and 'Country' (dropdown menu). At the bottom right, there are two links: 'Already a member? Sign in' and a blue 'Register' button.

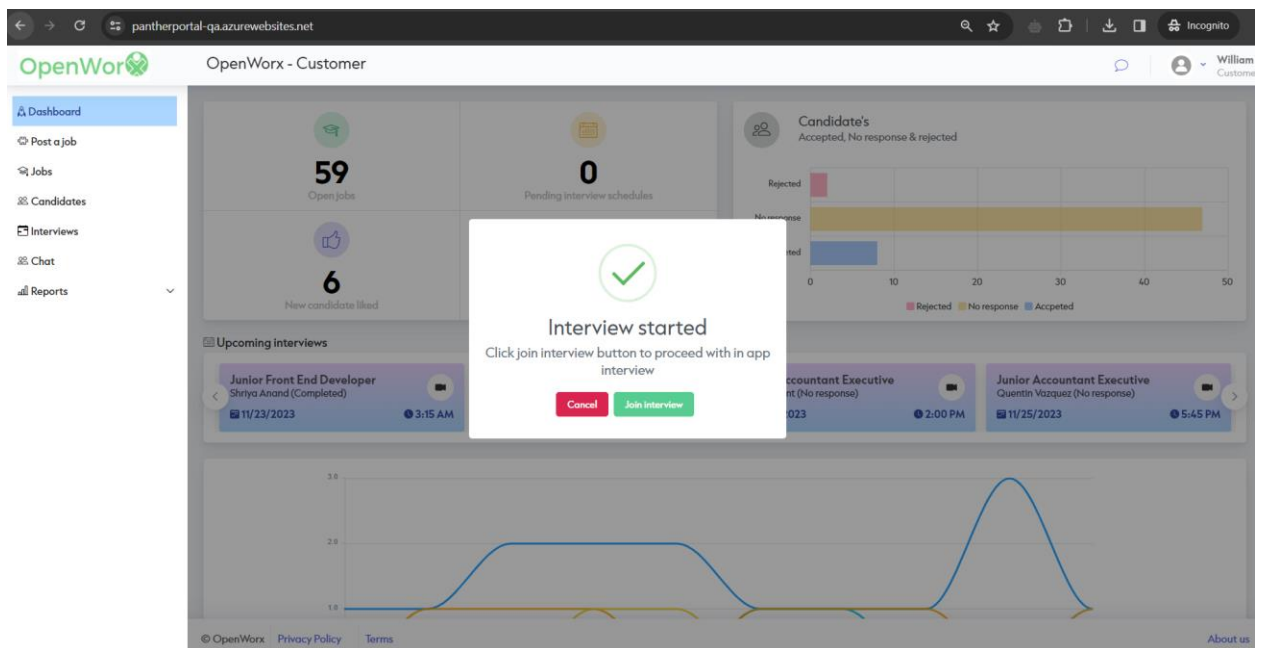

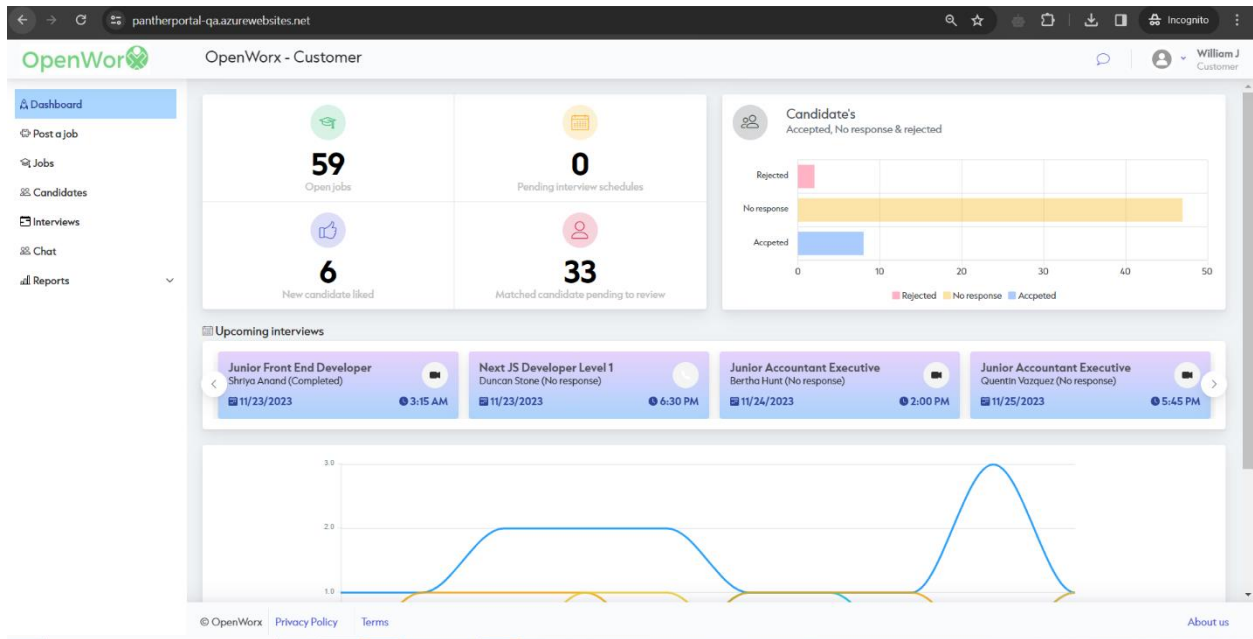

- **Login screen –**

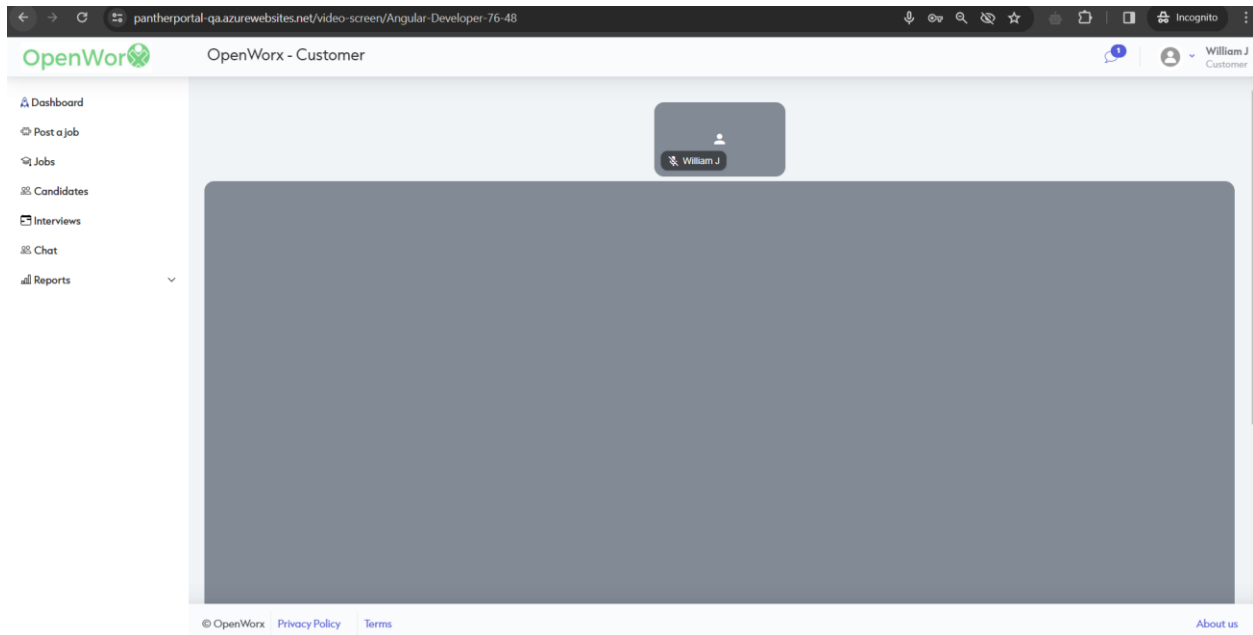

- Once an admin creates a Employer or Employer register itself the Employer will be able to log in successfully with their credentials.
- Also once employer created a account after they able to login into the application but not able to post a job before they add the billing details and admin will approve the employer account.

- **Dashboard –**

- On the dashboard, Employer can view the following statistics: the number of open jobs, pending interviews, upcoming interviews, and matched candidates pending review. Additionally, a bar graph illustrates the distribution of Rejected, Scheduled, and Accepted interviews.
- In addition to this, a line graph displays job statistics on the dashboard.
- Another section on the dashboard is dedicated to upcoming interviews. Employer can join an interview by clicking on the 'Join Interview round' button.

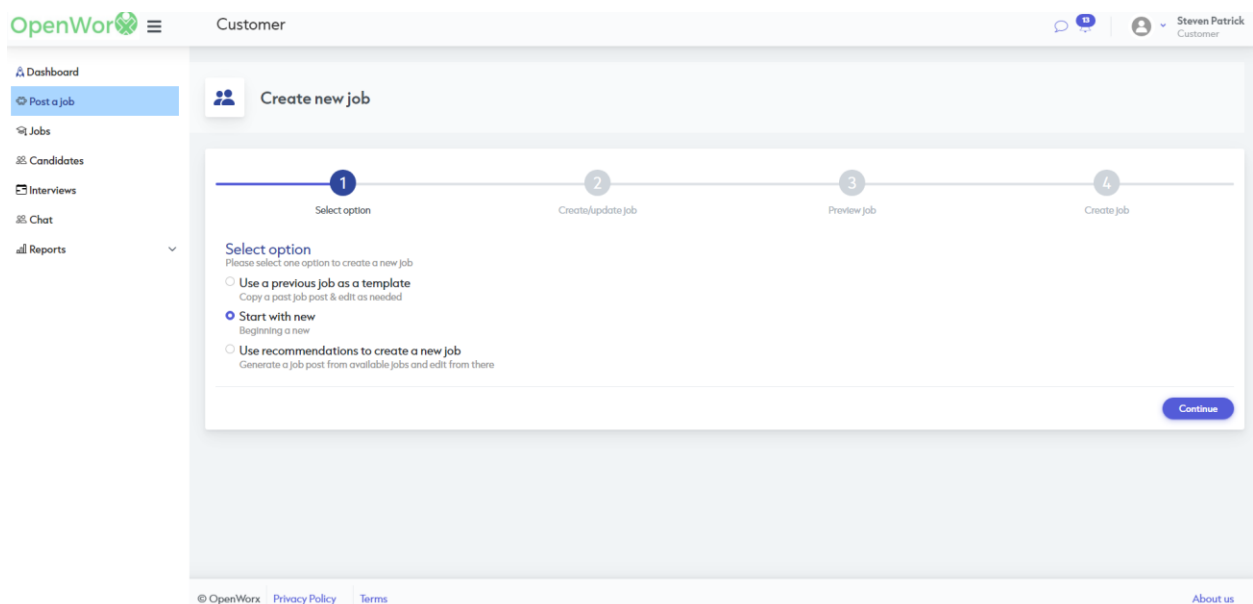

- **Post a Job -**

The Employer will post a job Use a previous job as a template, Start with a new and Use recommendations to create a new job option.

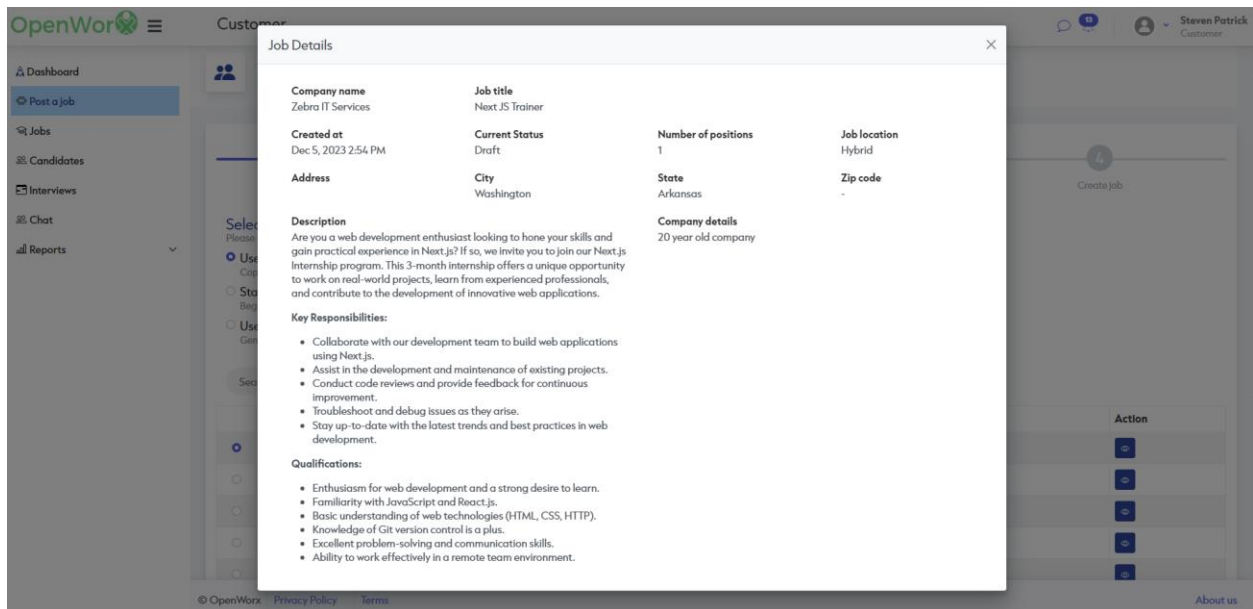

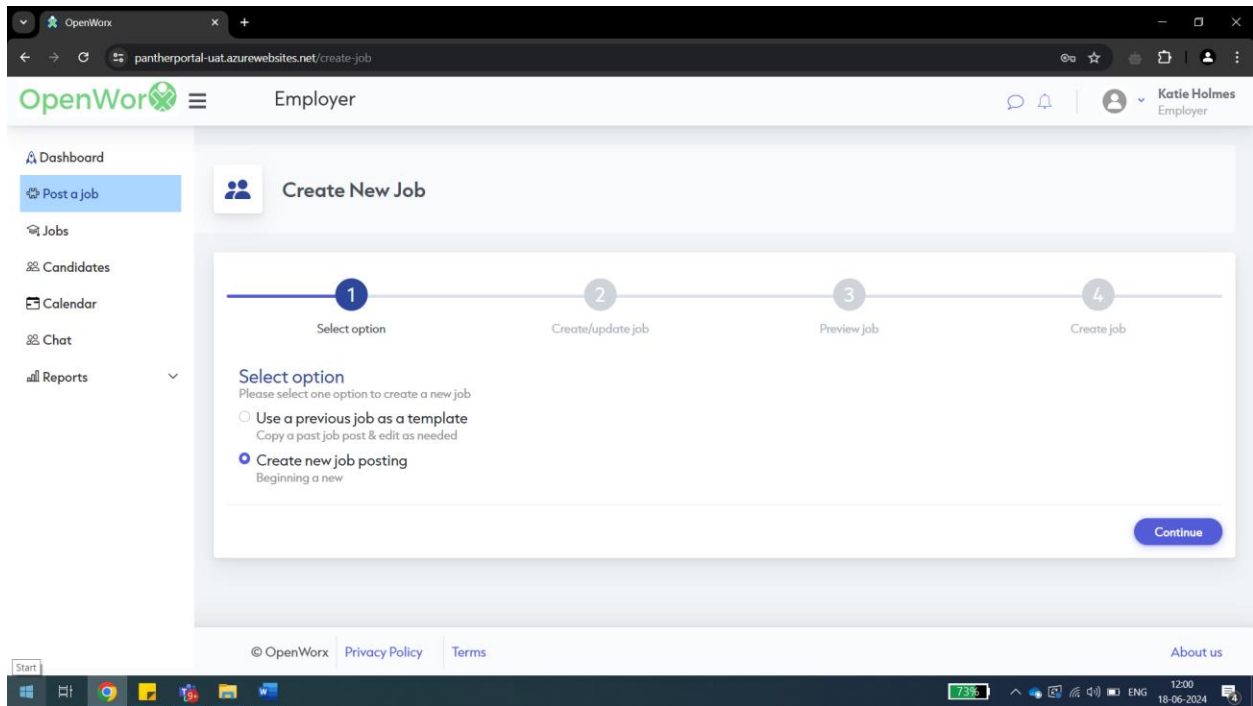

After the account is created employer only posts a jobs once the admin approves the employer account and the employer adds the billing details.

- **Start with new**

- **Use a previous job as a template option** - Pull the latest 10 jobs as templates from the same company.

- The Employer will select one job and click on the continue button.
- Also, Employer click on the eye icon in the Action column to see the Job details.
